CAREER OBJECTIVE:

Motivated IT graduate seeking an entry-level position to apply my programming skills, database knowledge, and problem-solving abilities. Eager to learn new technologies, contribute to projects, and grow professionally in a dynamic work environment.

PROJECTS: -

Learning Management System (LMS)

Developed a scalable online learning platform supporting **course management, assessments, user roles, and progress tracking**. Built using **Java, Spring Boot, Microservices, and MySQL** for the backend, and **Angular, TypeScript, HTML, CSS** for the frontend. Implemented **JWT-based authentication**, modular microservices, and responsive UI to ensure secure and seamless user experience.

Full-Stack E-Commerce Platform

- Designed and implemented a complete e-commerce platform with product catalog, shopping cart, order management, and secure checkout workflow.
- Developed microservices backend using **Java, Spring Boot, REST APIs**, and **MySQL**, integrating **JWT authentication** and **API Gateway routing** for secure service communication.
- Built responsive frontend with **Angular, TypeScript, HTML, CSS**, enabling smooth user interactions and real-time updates for product and cart data.
- Optimized database models and queries implemented pagination and caching to improve performance and reduce latency.
- Ensured end-to-end transaction reliability, from user login to checkout, resulting in seamless shopping experience across services.

TECHNICAL SKILLS: -

Programming Languages:

- **Java (Core & Advanced):** OOP, Exception Handling, Collections (List/Set/Map), Generics, Streams, Multithreading, Concurrency, File I/O, Serialization

Backend Development:

- **Spring Boot / Spring Framework:** REST API development (Controllers, Services, DTOs, Validation, AOP, Global Exception Handling)
- **Microservices Architecture:** Feign Client, Web Client, Rest Template, **Eureka Service Discovery**, **API Gateway**, distributed communication, token forwarding

Security & Authentication:

- **Spring Security + JWT:** Authentication/Authorization, RBAC (Role-Based Access Control), request filtering, secure token validation, stateless sessions

Database & Persistence:

- **MySQL / SQL:** Schema design, CRUD, joins, subqueries, indexing, stored procedures, optimization
- **JPA / Hibernate:** ORM mapping, entity relationships, fetch strategies, pagination, transactional operations
- **JDBC:** Low-level DB connectivity and execution

Frontend Technologies:

- **Angular:** Components, Services, Routing, Reactive programming (RxJS), SPA architecture
- **UI Technologies:** HTML5, CSS3, JavaScript, DOM manipulation, responsive layouts

Tools & Platforms:

- **Build & Version Control:** Git (GitHub/GitLab), Maven/Gradle
- **API Tools & Logging:** Postman, Swagger, Splunk
- **IDEs & DB Tools:** IntelliJ IDEA, Eclipse, SQL Developer, MySQL Workbench

EDUCATION QUALIFICATION:

Master of Computer Science 2022–2024

St. Joseph's College (Autonomous), Trichy

CGPA: 7.81 / 10

Bachelor of Computer Science 2019–2022

Arul Anandar College (Autonomous), Madurai

CGPA: 7.22 / 10

CERTIFICATIONS: -

Java Development Course – QSpiders, Velachery (2024)

DECLARATION: -

I confirm that the details mentioned in this resume are accurate and genuinely represent my qualifications and experience.

Yours faithfully,
Salamon Santhiyahapper P
